

Subject: Elevating Qdrant's Cloud Operations

Dear Hiring Manager,

I am excited to express my interest in the Senior SRE Engineer - Cloud Operations role at Qdrant. With over 19 years of experience in designing and implementing scalable and reliable platforms, I have a proven track record in driving operational excellence and cloud infrastructure management.

At Nokia, I led the migration of hundreds of workloads to a unified on-premises and Amazon Web Services Elastic Kubernetes Service platform, achieving 99.95% availability and reducing operational incidents by 40%. I built enterprise-grade GitOps and continuous integration/continuous deployment platforms, designed observability stacks, and led FinOps initiatives that cut cloud spend by approximately 15% year-over-year. My experience in Kubernetes, monitoring, alerting, and incident management aligns perfectly with the responsibilities outlined in the job description.

Qdrant's mission to revolutionize data management and AI-driven search resonates with my passion for improving operational efficiency and reliability. My expertise in DevOps strategy, cloud migrations, and observability data pipelines can contribute significantly to your team's success in maintaining and evolving production cloud infrastructure at scale.

Thank you for considering my application. I look forward to discussing how my skills and experiences can benefit Qdrant's mission and operational excellence.

Sincerely,

Narendranath Panda
